CrescentOne 2026 Webinar Series

Seven sessions - New features - AI innovation - Supplier collaboration - Inventory and quality

Join us live - Free to attend - Open to all CrescentOne customers and partners

Announcing the 2026 CrescentOne Webinar Series

Here are the dates and highlights of the upcoming 2026 Webinar Series. The series showcases the latest innovations in C1 v2, including AI automation, factory planning, analytics, inventory quality, supplier collaboration, and streamlined approvals.

Webinar schedule overview

#	WEBINAR TITLE	DATE
1	**C1 v2 New Features**	Thursday, 25 June 2026
2	**AI-Based AP Automation and Line-Level Matching**	Thursday, 30 July 2026
3	**Factory Planning New Features**	Thursday, 27 August 2026
4	**The CrescentOne AI Strategy and available + planned capabilities**	Thursday October 1st, 2026
5	**Inventory Management - Maximizing Availability with Minimal Effort Whilst Ensuring the Desired Quality Levels Are Maintained**	Thursday November 12th, 2026
6	**The New Self-Service and Information-Sharing Supplier Portal**	Date & Time TBC
7	**Real-Time Electronic Reviews and Approvals/Rejections via Email or Teams Chat Without Logging into C1**	Date & Time TBC

What the series covers

Minimize effort
AI and Automation

Maximize Visibility
Electronic Documents and Visual Analysis

Iterative on-demand analysis
Using AI and Natural Language

Collaborate
Connect teams and Suppliers

Webinar Highlights: Release and AP Automation

1
WEBINAR

Thursday, June 25th - 4 PM CEST (Europe) / 9 AM CST (US)

C1 v2 New Features

A high-level review of the new features available as part of the new C1 v2 release. This will be followed by a series of more detailed webinars that provide detailed reviews of each additional capability.

- **New release**
- **Platform overview**

2
WEBINAR

Thursday, July 30th - 4 PM CEST (Europe) / 9 AM CST (US)

AI-Based AP Automation and Line-Level Matching

Rapid implementations that automate both AP invoice creation and receiver matching with almost zero setup.

The AI-based template-less solution simplifies and minimizes the implementation time required to just hours/days, thus keeping the Total Cost of Ownership low and maximizing the Return on Investment. This is achieved because no template definitions are required, thus minimizing internal friction and the effort, time, and cost to go live.

The new automated invoice/receiver line-level matching process leverages the line-level information created by the automated extraction processes. For most companies, this represents a dramatic reduction in both cost and effort when compared with existing deferred vouchering and manual vouchering processes.

- **AI automation**
- **Line-level matching**
- **Low TCO**

Webinar Highlights: Planning, Analytics and Quality

3
WEBINAR

Thursday, August 27th - 4 PM CEST (Europe) / 9 AM CST (US)

Factory Planning New Features

Discover new visual, analytical, and comparative capabilities in Factory Planning.

Immediate visibility of the impact of different simulated production schedules on each and every customer order.

Compare alternative simulated schedules to identify the optimum plan, considering the balance of production efficiency, utilization, and customer on-time delivery adherence.

- **Planning**
- **Simulation**
- **On-time delivery**

4
WEBINAR

Thursday October 1st, 2026

The CrescentOne AI Strategy and available + planned capabilities

Discover the new C1 website Chatbot, AI based Support assistance, PDF Extraction and Automation capabilities, and Authenticating/connecting with AI, the Microsoft Power Platform, Avalara, etc.

- **Natural language**
- **Support**
- **Business benefit**

5
WEBINAR

Thursday November 12th, 2026 - 4 PM CEST (Europe) / 9 AM CST (US)

Inventory Management - Maximizing Availability with Minimal Effort Whilst Ensuring the Desired Quality Levels Are Maintained

Discover how the latest enhancements to Quality Management help manage inventory and inventory quality with minimal effort.

Meet the new status-driven customer and supplier returns management capabilities that:

- provide guided processes requiring minimal effort and help to minimize the impact on the business when replacements/credits are necessary; and
- ensure returns, replacements, and credits can be carefully processed, re-planned, tracked, and managed.

- **Inventory**
- **Quality management**
- **Returns**

Webinar Highlights: Supplier Portal & Real-Time Approvals

6
WEBINAR

Date/Time to be Confirmed

The New Self-Service and Information-Sharing Supplier Portal

Meet the new supplier information-sharing and self-service experience.

Automatically provide your suppliers with self-service, real-time access to the data they need so that you don't have to.

Real-time visibility and direct access to new and changed orders, shipments due, receipts, quality alerts, information shares, account balances, and payment details provide your suppliers with all the information they need in a modern, secure, easy-to-use, self-service platform.

For those suppliers who have limited software, it also provides the ability to create shipments, record carrier tracking info, and print pack slips.

- **Supplier portal**
- **Self-service**
- **Real-time access**

7
WEBINAR

Date/Time to be Confirmed

Real-Time Electronic Reviews and Approvals/Rejections via Email or Teams Chat Without Logging into C1

Learn how the new approval processes offer PR, PO, and AP approval solutions, where the out-of-the-box solution provides:

- Standard authentication and connectivity to synchronize necessary approval information between C1 v2 and M365.
- Flexible sample approval workflows that can be extended/built to meet the specific business need using either Power Automate or AI tools.
- An electronic review and approve/reject process conducted outside of C1, where:
- Approval/rejection is conducted via email/Teams Chat without logging into C1.
- Instant access to relevant documents/content (i.e., electronic copies of PR, PO, supplier invoices, pack slips, damage reports, etc. in SharePoint) is provided via the email/Chat (again without logging into C1).

- **Approvals**
- **Microsoft 365**
- **SharePoint documents**
