

CASH MANAGEMENT

Reduce time spent on routine tasks while improving accuracy

GLOVIA G2 Cash Management offers extensive tools to manage multiple bank accounts efficiently, including electronic fund transfer and bank reconciliation. The solution distinguishes itself through its powerful Cash Forecasting engine, which enables the user to analyze cash inflows and outflows for any time period and currency by applying selected forecasting methods. Cash Management is a focused hub in the GLOVIA G2 suite, providing a comprehensive view of cash-related transactions throughout the system.

Electronic Interaction

Reduce time spent on routine tasks while improving accuracy:

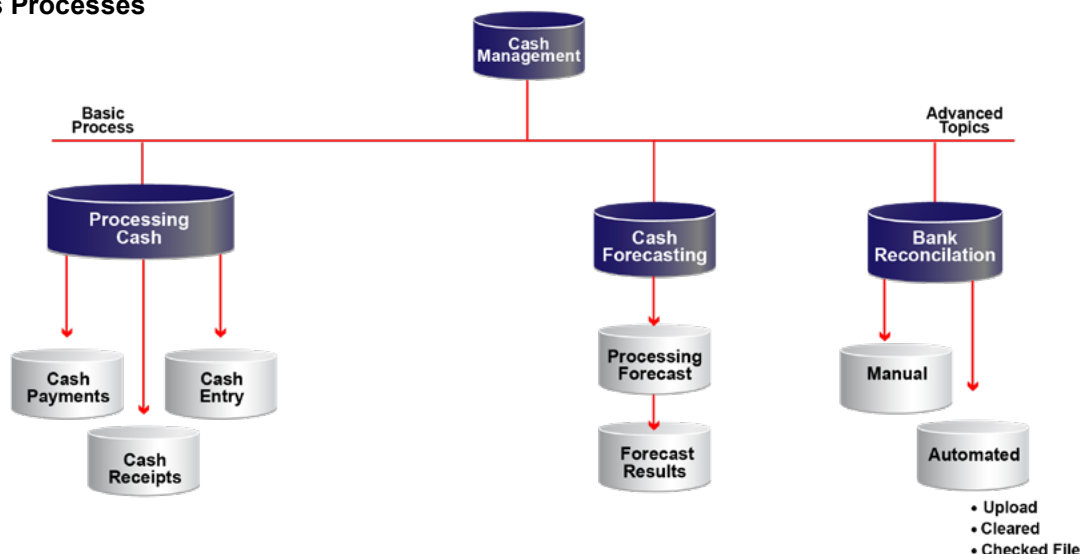

- Pay your vendors via wire transfers
- Collect from your customer using direct debits
- Reconcile your accounts by uploading your bank's cleared check file

Cash Forecasting Questions

- How much capital do you need to raise to support your expansion?
- Can you afford to offer extended payment terms to your most important customer?
- If you hired two temporary collection clerks, would the improved cash inflow allow you to buy critical equipment sooner?
- If your vendor offered you better terms, would you purchase more?
- If everybody paid you on time and you paid everybody on time, what will your bank balances be in August?

Cash Forecasting tools provide you with timely, accurate answers to all your cash management questions and empowers you to effectively and efficiently manage your other bottom line – your cash.

Business Processes

Centralized Control

Cash Management is fully integrated with the entire GLOVIA G2 suite of applications. Cashbook and Cash Forecasting draw against GLOVIA G2 information contained in:

- Accounts Payable
- Accounts Receivable
- Purchasing
- Sales Contracts

This enables the user to perform timely interactions and complete analyses through a rich feature set.

Cashbook

- One or more suppliers per item
- Effectivity date by range
- Supplier split percentages and priorities
